Subject: Review of core strategy - basements

Dear Sirs,

We are very concerned by the number of basement developments in the Kensington area which have had a severe negative impact on residents quality of life and possible long term negative impacts on the building structure of surrounding properties.

We support Councils proposals to change the policy towards basement developments and are in favour of much stricter guidelines in order reduce the number of such developments.

However, we are very concerned that Council is considering including listed buildings in limiting developments to one story and no more than 50% of the garden. We believe that listed buildings should be EXCLUDED from this policy and not be permitted under any circumstances.

Yours faithfully,

Andrew & Jane Haworth- Booth
