Subject: [Partial Review of Core Strategy](#)

On behalf of the West London Residents Association we wish to comment on the draft planning policy with regard to Basements.

We believe that the draft planning policy proposed by the Council is sound both in its approach and content.

The practical application of the proposed policy we believe would be effective in alleviating many of the present problems encountered by residents when new basements are constructed.

The restrictions placed on the where and how of basement development and construction by the draft policy is we feel justified . They attempt to alleviate the problems often caused to residents by new basement construction whilst at the same time allowing additional basement construction in appropriate locations.

Dr Gordon Taylor

Chairman West London Residents Association
